administrator. We apologize for any inconvenience this may cause you. From the Blog Finally the time has come for a general release. Carbonite has been in testing mode for several months. On Monday, May 6th, we had a sneak peek of the latest version of Carbonite. This version includes a redesigned user interface with improved sorting, viewing and navigation. We also expanded the Mac OS X installer to accommodate easier installs for Mac users. For a limited time, those using the Carbonite Pro (hosted) package can upgrade to Carbonite Pro (managed) for free. Important: If you are an existing Carbonite user that is not already set up for managed service, Carbonite does not require an activation code. We are no longer requiring the user to provide their activation code to us. They must only provide their email address and password to log into the control panel. This release is a production release for Carbonite Pro. It is available on the production servers immediately. All current users have already received an email from Carbonite, directing them to the Carbonite Pro download page. We 1d6a3396d6
