
PATCHED SRS Audio Essentials V1.2.3.12 Final By Bobiras2009

[Update on 21 June 2019] With this new version I will start with a (very) complete overhaul of the format (I mean the format itself plus the way SRS works as such). So, if you run the sound program that I made (and you may find it in the link section of the forum) BEFORE downloading this patch, your old preferences and settings will remain intact. The biggest change in this version is the increased compatibility of the server. Now, you are no longer limited to 3.5.0.x or lower (in fact, I have received reports that some 3.6.x servers work just fine with this patch, so expect an update for 3.6.x later on). I have also made some changes to the formatting of the files (so SRS is really easier to read, and the encoding is cleaner). I know that this is a long and boring read, but I hope you'll enjoy the patch. Any questions or suggestions are welcome. Where is the Sound Quality fix version? (There is a problem with the Sound Quality) Support me by donating on Paypal and I can upload a patch version for those that can not use the Sound Quality fix version. But I can't give a donation support to other version. :([Edit] : I have uploaded a Sound Quality fix version, you can download it by going to : I have uploaded a Sound Quality fix version, you can download it by going to : I have uploaded a Sound Quality fix version, you can download it by going to Where is the Sound Quality fix version?
